

Python Class 2020
Assignment #1: Guessing Game

Your python code will randomly choose a whole integer between 0 and 100 and you have to guess what it is. Your program will keep asking until the user correctly guesses the answer.

Your program must:

- Ask for a guess
- Check for invalid inputs ($0 \leq \text{guess} \leq 100$)
- If guess is too high, print “Too High!”
- If guess is too low, print “Too Low”
- If guess is correct:
 - Exit loop
 - print “Winner!”
 - print number of guesses it took
